3100 Rio Grande Circle
Cresson, TX 76035

E-mail: Putteetboard@gmail.com

The Putteet Hill HOA's three-member Architectural Control Committee ("ACC") will review this application and the accompanying architectural plans, designs and materials, and the Site Plan for completeness and compliance with the Declaration Restrictions and Rules, and the Design and Construction Guidelines, resulting in the decision indicated below.

Putteet Hill Homeowners Association

Architectural Control Committee (ACC) Application

ARCHITECTURAL DESIGN & CONSTRUCTION APPLICATION

Requirements and Documentation:

Please review the following binding provisions from the Putteet Hill Phase One Protective Covenants and Rules and Regulations that govern lot preparation:

1. **Mandatory Written Approval:** Before making any improvements, alterations, or starting a construction project on a lot or dwelling, a builder must apply for and receive written approval from the ACC. Verbal approvals do not constitute valid authorization. Contractors who desire to bench a lot prior to submittal of a full formal ACC Application may submit an "Appendix A" form to the ACC requesting approval to begin benching lots. After submittal of the form with accompanying requirements and documentation along with $100 to the Putteet Hill Treasurer and approval granted from the ACC Committee, may conduct benching of lots. Following completion of benching of lots and prior to conducting construction on the home site, contractors must submit a full formal ACC Application to the ACC Committee along with all permits required by the City of Cresson, all plans, drawings, and other documentation required by the Putteet Hill ACC Application form. This includes the submittal of all fees for each element of the building project to the Putteet Hill Treasurer. Upon, approval by the ACC Committee, the contractor can begin the construction of the home site.
2. **Definition of Regulated Disruption:** Under Section 1.24, "excavation" is defined as any disturbance of the land surface resulting in the removal of earth, rock, or other substances to a depth of more than 18 inches. Furthermore, Section 1.38 classifies any change in the natural grade of a lot by more than 6 inches as a regulated structure requiring prior committee approval.
3. **Erosion Control Compliance:** Section 1.2 requires strict adherence to national E.P.A. standards and TCEQ SWPPP requirements. A silt barrier fence must be securely installed on the lower or storm water run-off side of *each and every lot* during any construction or site disruption.
4. **Landscape and Tree Preservation:** A formal "Landscaping Installation Plan" must be submitted and approved before certain site work begins. This ensures that required native trees (which must have a caliper exceeding 3 inches) are properly identified and protected during the clearing process.
5. **Timeline Restrictions:** Once a project receives written approval, work must commence within ninety (90) days, or the approval will automatically expire, requiring a new application submittal.
6. **Overhead Google Earth Pictures of Lots:** Contractors are required to submit Google Earth overhead pictures of all lots which will be benched and require construction of a home site. This is required to provide the ACC Committee a view of the lot, its natural drainage, as well as a view of the native vegetation and trees.
7. **Requirement to Annotate Google Earth Pictures of Lots:** Contractors will determine which vegetation and trees that will be required to be removed along with an explanation of why they are to be removed. Contractors will annotate all the Google Earth Pictures denoting which vegetation and trees will be removed and which ones are recommended to be retained to preserve the natural landscape of the lot.

Moving forward, any unauthorized clearing, grading, or digging prior to receiving your formal ACC approval letter will be considered a formal covenant violation and a neighborhood nuisance. This may result in immediate stop-work orders, legal injunctions, and discretionary daily fines assessed against the lot owner and builder. We want to help you get your projects approved and moving as efficiently as possible. Please ensure all digital or physical sets of plans, plot plans, site drainage blueprints, and landscaping layouts are submitted completely to give the committee the required time to review and issue an official response.

By submitting this application, I understand and acknowledge that:

1. I have read and will comply with the requirements listed in the Declaration of Covenants, Conditions and Restrictions, as amended, for the Putteet Hill subdivision, the Rules & Regulations, and the Minimum Design & Construction Standards, and the ByLaws of the Putteet Hill Homeowners Association, Inc. (The "Governing Documents" available from the Association.)

2. I have been provided a copy of the Declaration of Covenants, Conditions and Restrictions, and the Rules & Regulations and this ACC Application and the Minimum Design & Construction Standards for the Putteet Hill Addition and the Putteet Hill Homeowners Association, Inc. to my Contractor.

3. United Cooperative Electrical Services has asked the developer of Putteet Hill to advise Buyers that "if the home's electrical meter is located further than 200 feet as measured by the length of the electrical service from the transformer to the electrical meter, then the homeowner will incur an additional one-time construction expense for the initial service paid to the electrical provider".

4. When this ACC Application is approved, I will provide a copy of this application to my contractor. (If a culvert is to be installed, the approved application will include the required size of said culvert, per engineering for the development.) And, I will advise my contractor that all home contractors must sign this document and the Governing Documents, and abide by them, subject to the ACC's enforcement.

5. The Architectural Control Committee (the "ACC") has up to 30 days to review this application when complete. The ACC will not process an incomplete application. If the ACC requires additional information, the 30-day period for approval starts over when the revised document(s) is/are resubmitted by Applicant to the ACC.

6. After approval, any subsequent alterations to the proposed Dwelling(s) or Improvement(s) will be submitted to the ACC for approval prior to implementation of alterations.

7. No work will commence without written approval from the ACC.

8. In the event that a Stop Work Order is issued, all work on the Lot will stop pending resolution of the issue as stated in the Stop Work Order.

9. Work must start within 180 days of approval by the ACC.

Putteet Hill Homeowners Association

Architectural Control Committee (ACC) Application

ARCHITECTURAL DESIGN & CONSTRUCTION APPLICATION

10. Granting of approval by the ACC shall in no way serve as a guaranty or warranty as to the quality of the plans or specifications, nor the habitability, feasibility or quality of the resulting Dwelling(s) or Improvement(s).

11. Inspections by the ACC are completed only to confirm compliance with approved applications, including placement on the Lot, culvert size and installation, minimum construction standards, and the Governing Documents for the Putteet Hill subdivision and the Putteet Hill HOA.

12. Non-compliance with the Declaration of Covenants, Conditions and Restrictions, the Rules & Regulations and the Minimum Design & Construction Standards and/or this application, may result in a fine to the Lot Owner.

Owner must submit all construction plans in PDF form. Plans must include the following

- Site Plan with Square Footage of Structures, and location of Structures, Driveway, Propane Tank, Septic, Water Well, Fences, Walls, Sheds, etc.
- Elevations (with height and exterior materials), Floor Plans, Roof Plan
- Storm Drainage Plan
- Setbacks and Footprints and Height Dimensions

Please submit the application via email to:
